

SABRINA YEN SOOK PING

Full Stack Software Engineer

Petaling Jaya, Selangor, Malaysia | +6012-528 8801 | sabrinayen1301@gmail.com

PROFESSIONAL SUMMARY

Full stack software engineer with 4+ years of experience building and maintaining responsive, high-performance web and mobile applications across e-commerce, healthcare, fintech, and NFT platforms. Skilled in React, Next.js, .NET Core, and RESTful API design, with hands-on experience across the full development lifecycle — from front-end UI, back-end services, and database optimization to CI/CD automation and cloud deployment (AWS). Proven track record leading front-end modernization projects, mentoring team members, and collaborating cross-functionally to deliver reliable, scalable software solutions.

TECHNICAL SKILLS

- Languages & Frameworks: JavaScript, HTML, CSS, jQuery, React.js, Vue 2, Next.js, Nuxt 2, React Native, .NET Core, .NET Framework, Python, Vite
- Databases: MS SQL Server, MySQL, PostgreSQL, Firebase
- Cloud & DevOps: AWS Lambda, GitLab CI/CD, Webpack build optimization, RESTful API integration
- Tools & Design: Adobe XD, Figma, Wondershare Filmora

PROFESSIONAL EXPERIENCE

Assistant Manager (Senior Software Engineer) — Aeon Credit Sdn Bhd

Oct 2024 – Present

- Refactored and upgraded front-end applications using React.js, improving responsiveness and overall user experience.
- Designed, maintained, and optimized .NET Core / .NET Framework APIs to ensure system scalability and security.
- Developed and integrated RESTful APIs to enable seamless communication between internal systems.
- Optimized MS SQL Server and MySQL database architecture and queries, improving database performance.
- Implemented GitLab CI/CD pipelines and automated deployment workflows using AWS Lambda, streamlining release processes.
- Improved Webpack build performance and created reusable components to standardize shared UI layouts across teams.
- Guided and reviewed vendor-delivered projects to ensure proposed processes and solutions met company standards.

Front-End Developer — Snsoft Sdn Bhd

Jun 2022 – Oct 2024

- Implemented responsive web design principles, ensuring company websites rendered consistently across devices.
- Built landing pages using JavaScript and jQuery based on client requirements.
- Developed and maintained feature enhancements for existing platforms based on client needs.
- Contributed to major system performance optimization initiatives.
- Conducted regular code reviews to ensure adherence to best practices and coding standards; provided coding and debugging support to team members.
- Focused on mini-program (small applet) development as a primary area of contribution.

Front-End Developer (Part-Time) — Revnology PLT

Aug 2022 – Oct 2022

- Delivered rapid bug fixes and issue resolutions.
- Developed and built standalone landing pages; monitored and maintained website stability.

Intern / Part-Time Staff — Revnology PLT

Jun 2021 – Jan 2022

- Developed features to enhance user experience and built responsive, functional user interfaces.
- Managed and updated multilingual content data across projects.
- Debugged and resolved issues encountered during development while learning multiple programming languages.

SELECTED PROJECTS

Setia Didik — E-Commerce Platform — setiadidik.com

- Built a responsive online bookstore and stationery e-commerce site; implemented client-side functionality with JavaScript/jQuery and resolved quality issues across devices.

Dream Car Art Contest — Toyota Malaysia Campaign Site — toyota.com.my/dreamcarartcontest

- Built a custom, responsive single-page interactive contest site using HTML, CSS, and Bootstrap.

Aequo360 — Healthcare Services Platform — aequo360.com

- Built client-side features enabling patients to view records and book appointments; maintained multilingual content accuracy via Google Sheets integration.

MetalHead — NFT Platform — metalheadsnt.com

- Built reusable UI components and responsive layouts for an NFT browsing and minting platform.

Interact — Enterprise Management System — interact.com.my

- Built web and mobile interfaces using Next.js and React Native for a business management system with real-time revenue and sales reporting.
- Developed and maintained data visualization modules for key business metrics.

Study Timer — Productivity Web App — study-timer-eight.vercel.app

- Designed a desktop-optimized focus timer with keyboard controls and an integrated motivational-quote API.

Final Year Project: QR Code & GPS-Based Mobile Attendance System

- Built an Android attendance-tracking app for small classes/workplaces (~15 people) using Java, Firebase, Cloud Firestore, Google Sheets, and Google Forms.

EDUCATION

Bachelor of Information Systems (Honours) — Information Systems Engineering

Universiti Tunku Abdul Rahman (UTAR), Kampar Campus | May 2019 – Oct 2022

Foundation in Arts

Universiti Tunku Abdul Rahman (UTAR), Kampar Campus | May 2018 – May 2019

ADDITIONAL INFORMATION

- Languages: Fluent in English, Mandarin, Cantonese, and Malay
- Strong adaptability and creative problem-solving with a collaborative, proactive working style
